

TUESDAY, SEPTEMBER 25, 1744.

Yesterday arriv'd the Mail due from Holland.

Warsaw, September 12.

It is look'd upon now as a Thing certain here, that there will be no Attempt made in the Dyet, to augment the Forces in this Country, from an Apprehension, that instead of its contributing to the Peace and Security, it might possibly turn to the Prejudice of the Republick, by giving Umbrage to some of her Neighbours. Count Esterhazy, the Queen of Hungary's Minister, has receiv'd a sudden Order from his Court, to repair to that of Russia; which is suppos'd to be occasion'd by the Sickness of Count Rosenberg, who was intrusted with the Negotiation of an important Treaty at Moscow. All the necessary Preparations are making for the King's Journey to Grodno; and the Guards, and some other Forces, have already begun their March that Way.

Copenhagen, Sept. 19. Orders have been sent to the Troops quarter'd in Norway, to hold themselves ready to march; which is attributed to the Court's having enter'd into a new Treaty of Subsidy with the Crown of Great Britain, the Ratification of which is hourly expected; in Consequence of which, a Body of Danish Forces will march for the Defence of the Electorate of Hanover, and be replaced by the Troops before mentioned, which are to be transported from Norway. The Artillery brought hither from Holstein, is order'd to be sent back. The Provisions in the Magazines that were lately fill'd at a great Expence, have been sold, except what was laid up in one of Hay; which is to be constantly kept up, and to be chang'd once a Year. The Prussian Secretary at this Court has, by Direction of the King his Master, assur'd our Ministry, that the late March of the Prussian Troops thro' the Electorate of Saxony, was with the full and perfect Consent of the Regency of Dresden, notwithstanding what has been reported to the contrary in most of the Gazettes in Europe.

Oprio, September 1. The Governor of Ferrol has order'd three Frigates to be equip'd to cruise upon this Coast, in order to reconnoitre such Vessels as approach it. The common Opinion is, that Admiral Torres's Squadron, together with the Register Ships from New Spain, are daily expected, and that this is the true Reason of equipping our Squadron. It is certain, that 16 large French Men of War are still cruising off the Rock of Lisbon.

Naples, Sept. 8. Two Regiments of Foot, that were quartered in our Castles, have, of late, receiv'd Directions to march directly to the Camp of Veletri, to which we daily send Recruits, and Horses, for reconnoitring the Cavalry. The Regency oblig'd the Guards to patrol thro' the Streets in the Day, as well as in the Night, to prevent the Consequences of Quarrels that often happen, as is suppos'd, with no good Design. There is a Line drawn from Magdalen's Bridge to Chiaia, which is well furnish'd with Artillery; and all People are forbid to pass to, or from that Neighbourhood, without Permission. It is thought these Precautions are taken, on Account of the Government's having discovered that an English Fleet will be shortly sent hither, to attempt an Invasion. The last Accounts from Reggio say, that only four People have died there of the Plague in a fortnight; and that for 16 Days last past, there has not died one; but on the 14th it is certain that a Person died at Rosali.

Leghorn, Sept. 11. On the 6th of this Month the British Fleet arriv'd here, under the Command of Vice-Admiral Rowley; it consists of three Ships of 90 Guns, five of 80, six of 70, four of 60, and three of 40; with two Fire Ships and a Bomb Vessel. The Squadron of 15 Sail of the same Nation, which has been for some time past on the Ecclesiastical Coast, arriv'd also Yesterday in our Road. We are extremely busy in providing all Sorts of Necessaries for that Fleet. This Morning a great Quantity of Biscuit was carried on board, 300 Oxen were likewise kill'd for their Use, and we expect that 200 more will be kill'd To-morrow. It is observ'd, as a Thing somewhat strange, that a vast Quantity of Hay is embark'd, which looks as if an Embarkation of Land Forces was intended; and some pretend to assert, that a Descent is to be made in the Neighbourhood of the City of Naples.

Rome, Sept. 12. At a Time when we least expected it, we are like to be deliver'd from one, if not from both the Armies, that have been so long in our Neighbourhood. The Spaniards began to move first; and it is

now about four Days ago since the Cannon, and heavy Baggage, were sent back towards Naples. This is attributed, by different People, to different Causes; some will have it, that his Sicilian Majesty has thought proper to retire, because Prince Lobkowitz has occupied such Posts as put it entirely out of the Power of the Neapolitans to send, with Safety, any Provisions by Sea. Others will have it, that certain Tumults and Insurrections in the Heart of his Kingdom, have made his Majesty's Presence necessary. In the mean time, there are not a few, who rejecting both these Accounts, persuade themselves, that the Secret is to be found in a new Treaty of Neutrality; which, however, is very improbable; since it is certain, that Prince Lobkowitz has detached 2000 Horse, and 1200 Warradins, to harass the Spaniards and Neapolitans in their Retreat. By the next Post, we shall be able to give you a better Account of the Matter; in the mean time so it is.

Vienne, September 19. Yesterday, the Day before, and this Day, Conferences have been held at Count Staremberg's, on the present Conjunction of Affairs. Prince Charles sets out this Day for Presbourg. There arriv'd some Hours ago, two Couriers, one from the Court of Saxony, and the other from Count Bathiani; but we cannot learn any thing as to the Contents of their Dispatches. The Army of Prince Charles is in full March for Bohemia, and consists of above 40,000 Men; the first Column of the Insurgents of Hungary, consisting of 15,000 Men, are also in full March thither; so that the Army, in that Part of her Majesty's Dominions, will, very soon, consist of 100,000 Men, including the Corps under the Generals Bathiani and Felsetitz, the Pandours of Baron Trenck, and the Hussars under the Command of General Nadasti. It is impossible for the Prussians to enter the Upper Silesia or Moravia, the Hacks having possess'd themselves of the Passes into both the Countries; there is, however, a Body of 12 or 14,000 Prussians encamped in the Neighbourhood of Troppau, and our Hussars have carried off several Waggon's laden with their Baggage.

Breslau, September 19. The Siege of Prague lasted just a Week, and cost the Besiegers no more than 30 Men kill'd; and 66 wounded. A Grenadier of the Regiment of the Prince of Hesse Darmstadt, whose Name is David Cravell, was the first, who, in the Scale of the 14th, mounted one of the Bastions at Veldt Marshal Schwerin's Attack. As he had neither Powder nor Ball, he defended himself, sword in hand; till his Companions join'd him. The King to give a publick Mark of his Satisfaction at so heroic an Action, order'd him to be plac'd in his Grenadier's Habit at the Veldt Marshal's Table, and gratified him after Dinner with the Commission of a Lieutenant, and a considerable Sum of Money. The Prince Leopold of Anhalt Dessau, who was likewise at Dinner, gave the Grenadier all the Gold he had about him. His Majesty has since ennobled this Grenadier by Patent.

Frankfurt, Sept. 27. M. D'Alion arriv'd here the Day before Yesterday, and had immediately an Audience of the Emperor; Yesterday he proceeded for Berlin in his Way to Petersburg. Prince William of Hesse Cassel assists duly at all the Conferences held here. Veldt Marshal Count Seckendorff arriv'd with his Army, as Yesterday, at Donawert; and it is thought, will pass the Danube this Day. After the taking of Prague, the King of Prussia's Army march'd towards Budweis, from whence he will continue his Route towards Linz, where he proposes to join Count Seckendorff. Part of the Army of Prince Charles of Lorraine is to join that of Count Bathiani at Egry; but the Gros of the Army has push'd higher up the Danube, in order to take Post between Passau and Linz, that they may be ready to dispute the Passage into the Upper Austria, with the Imperial Forces, and those of his Prussian Majesty.

Munich, Sept. 21. The General Baron de Serencliu arriv'd here on the 15th of this Month; as did, the Day following, a Battalion of his Regiment. The next Day came 150 dismounted Hussars, in order to escort the Baggage of that General, and of the Council of Administration, which set out that Day for Austria. As they press'd the Payment of Contributions with unusual Severity, and the Austrian Troops have every where received Orders to march, we expect they will very soon evacuate, not only this Capital, but the whole Electorate. In the mean time they have broke down all the Bridges on the Lech, near Fridbourg and Landsperg.

Brussels, Sept. 18. The Army of the Allies is on the Point of returning towards Oudenarde, which may, possibly, give Occasion to the French to attempt something on their March. It is said, that a certain Field Marshal had received Orders, from his Master, to attack the Enemy at any Rate; and, if so, we make no doubt

that the Action will be equally bloody and decisive. On the 24th, there arriv'd here 12 Waggon's full of English and Hanoverian Soldiers that are wounded. We are assur'd, that a Council of War will be shortly held, on some Officers, who are thought not to have done their Duty in the Affair near Limoy, on the 17th.

P. S. We have this Moment receiv'd Advice, that 30,000 Men from Alsace, have join'd Marshal Count de Saxe, so that we soon expect to hear something of Importance.

Hague, October 3. Mr. Trevor, Envoy Extraordinary from the K. of Great Britain, communicated lately, to the Lords of the Regency, the Contents of some Dispatches he receiv'd from Moscow; importing, that the Czarina has declar'd that she is determin'd punctually to fulfil all her Engagements; that she will, in a short time, declare as much to certain Foreign Courts; and that she will order her promis'd Succours to march without Delay. The Treachies were open'd before Fridbourg on the 26th; and the Report spread of M. Coignon's being kill'd with a Cannon Ball, is absolutely without Foundation.

General Post-Office, London, September 14, 1744.

Whereas a Term of Six Months was allowed, by the 19th Article of the Treaty of Utrecht, between Great-Britain and France, for the Subjects of both Crowns, in Case of a Rupture, to withdraw their Effects out of the respective Kingdoms; and whereas the said Term of Six Months, computing from the Time of the Declaration of War between his Majesty and the French King, is now near expired; Publick Notice is hereby given to all manner of Persons, whom it may concern, that no Packet Boat whatsoever, will be permitted to sail between Dover and Calais, from and after the 30th of this Instant, September, O. S. and that a Stop will, thenceforward, be put to the Communication and Correspondence hitherto allow'd of, by Means of the said Packet Boats.

By Command of the Post-Master General,
George Shelvoeke, Secretary.

Dr. ROBERT EATON'S BALSAMICK STYPTICK,

Truly prepared and sold at the Doctor's late Dwelling House, now Mrs. DUTTON's, in Salisbury-Court, Fleet-Street.

THIS Medicine restrains, in a most
surprising Manner, all internal as well as external Hemorrhages, i. e. it infallibly and quickly stops all dangerous bleedings at the Nose or Gums, spitting or vomiting Blood; also the immoderate Flux of the Hemorrhoids or Hem-fes; bloody Urine or Stools, bleeding of large Wounds, &c. (if used according to the plain Directions given with it) as will appear by the Certificates of several Eminent Physicians, and in the large Account of this Medicine, written by the Doctor himself, and dedicated to the College of Physicians a little before his Death.

It keeps good for many Years, at Sea or on Shore, in all Climates; therefore must be universally Useful.

The Doctor not only obtaining his Majesty's Letters Patent for the sole Vending of this most Excellent Medicine; but also a Clause in a late Act of Parliament, exempting this Medicine from the Inspection of the Censors of the College of Physicians, to which all other Medicines are liable.

N. B. The late Learned Dr. CHEYNE, in his Excellent Piece, entitled *The natural Method of curing the Diseases of the Body*, &c. prefers Eaton's STYPTICK to Helvetius's and other Stypticks; and speaks of it as follows:—"Every one knows the agglutinating Quality of sweet Blood, and I apprehend it is to this, that Eaton's Styptick owes its soft, mild, folding Efficacy.—It is more mild, substantial and soft, than the mildest Steel Preparations, and more fit to patch a Hole, or glew up a Rupture, or to give a Balsam to the acrid and inflam'd flowing Blood of the Patient. He says, he is confirm'd in this by a Physician of great Worth and Candor, who has great Opportunities of dealing in such Cases, by his Practice in Midwifery. See p. 182."

The so-much Fam'd HIPO-DROPS.

WHICH in a few Days infallibly cure
HYPOCHONDRIACK MELANCHOLY in Men, and the VAPOURS in Women, so as never to return again, so they ever so severe, or of many Years standing, and even after all other Remedies have prov'd ineffectual; and that by immediately striking at the very Root or true Cause, as well as remedying the Effects, of those perplexing Maladies and all their Variety of Symptoms, by which they mimic, by Turns, almost all the Diseases poor Mortals are afflicted with, and have their Rise from a deprav'd Appetite, vicious Ferment in the Stomach, and Indigestion of Food, whence proceed Crudities and flatulent or windy Disorders in the first Passages, ill Fumes, four Belchings, Cholick, and Uneasiness in the Bowels, which Crudities, offend the Nerves, and, by Consent of Parts, affect the Head, and produce sometimes Giddiness, Dimness of Sight, confused Thoughts, perturbed Watchings, troublesome Sleep, Frights, groundless Fears, and the deepest Melancholy, with direful Views and terrible Apprehensions; at other times, Fits, Flushing Heats, Reachings, Faintness, Lowness and Sinking of Spirits; Palpitation of the Heart, Startings, Tremblings, and Twitchings in the Limbs and other Parts, with many convulsive Disorders, sharp Pains, fix'd or wandering Pain and Weakness in the Back, and other, almost innumerable and grievous Symptoms, which miserably afflict vast Numbers of both Sexes.

All which Symptoms, in their sharpest Paroxysms, these in much fam'd and most pleasant Drops, (which are Chymically prepar'd from the most valuable Specifics in the Mineral, Vegetable, and Animal Kingdoms, and exalted to the highest Degree of Perfection possible) instantly quell, and at the same time annihilate their real Cause, directly bringing the Stomach into right Order, creating a good Appetite, rectifying the Digestion, occasioning laudable Chyle, and, of course, a good Blood, Plenty of calm, free, and cheerful Spirits, a regular Circulation of all the Fluids, and Strengthening of Nerves; so that both Cause and Effects of Melancholy and Vapours, are thoroughly removed by them, almost on the Spot, as the many Thousands of both Sexes they have perfectly cured, evince.

Whoever takes them for 3 Days only, will be sensible they are absolutely to be depended upon for an effectual and lasting Cure, and certain it is, that no Medicine upon Earth can equal them; be careful therefore to have the right Drops, which are to be had only at Mrs. Holt's, at the Crown and Star in Cornhill, below the Royal Exchange, at 3 s. 6 d. a Bottle with printed Directions at large.

An Infallible REMEDY

For BROKEN-WINDED HORSES,

WHICH has been published and sold
many Years before any Counterfeits in other Forms appeared; and highly commended from one Friend to another. The vast Quantities that have been sold to also verify its Efficacy and Virtues, for it most perfectly cures them, after all others Means have been ineffectual, to a Wonder, in a small time, without Confinement; by attenuating and opening the Globules of the Lungs, dried up, and all the Passages obstructed by Humours dripping thereon, occasion'd by hard Riding, Colds, &c. It causes presently a free Perspiration, renewing its Force, Vigour and Length again, as well as ever.

It immediately cures those Horses only a little touch'd in their Wind, as also all continued Coughs, Colds, Wheezing, &c. being excellent in preventing many other Disorders incident unto them, by maintaining, preserving, and continuing a good Breath.

And in a word, by this very Medicine alone, many Horses have been made so perfectly sound, that they have been sold and valued from 10 to 50 or 60 Pounds, which by being Broken-winded, could not before be sold for 3 or 4 Pounds.

It is sold at Mr. Sandwell's Toy-Shop at the Griffin, the Corner of Buckler's-Bury in the Poultry, at 4 s. 6 d. the Quarter Bottle, with Directions for taking it; and no where else in England.
